Adagio Cloud

The award-winning Adagio Accounting is conveniently available to you—in a cost-effective, secure, 24x7 environment, accessible from anywhere you are.

Adagio Cloud Platforms

Introduction

As small businesses, including non-profits and government agencies, recognize that the life cycle of servers and related equipment is typically 36 months, the trend for cloud-based applications continues to build momentum. The cloud provides small businesses with a more cost-effective way of acquiring software and computing power. Adagio Accounting is now available as a cloud (hosted) solution.

Competitive Advantage

- Packaged and priced as cost-effective, high-value bundles of accounting applications.
- Allows up to 5 companies in the base subscription.
- Concurrent users licensing model is based on the number of simultaneous users logged in Adagio Cloud.
- Clients may control the schedule for installing upgrades and updates as not to interfere with audits, year-end close and other events.
- Self-manage user accounts—no wait time for the hosting company to provision.

Benefits

- Provides the benefits of a common organizational database, while it eliminates the large upfront costs of purchasing and maintaining a LAN.
- Provides advanced financial reporting and best-in-class audit controls.
- Enables you to schedule software upgrades and updates according to your timetable, as not to disrupt events like year-end close or audit.

Discover why Adagio is the preferred accounting system for companies that process large volumes of transactions, and require more powerful financial reporting capabilities.

Adagio Cloud in the Warehouse

Available Award-Winning Products

Adagio Cloud includes all of our accounting applications. To assist you in getting up-and-running quickly, we have a large network of consultants that can setup your Adagio Cloud, migrate data from your legacy systems, and provide training and on-going support.

Your accounting and management personnel simply require internet access to login to our products through Adagio Cloud conveniently from any authorized computers and devices, 24x7. Whether you are processing transactions in the office, reviewing quarter-end sales reports at home, or performing inventory stock-taking at a remote warehouse, our Cloud is your safe, reliable choice.

Adagio Core Products	Adagio Modules
Adagio Core	General ledger, financial reporter, accounts payable and bank reconciliation
Invoicing	Accounts receivable, time and billing, service invoicing, CRM / quote management and RMA processing
Orders	Accounts receivable and order entry
Inventory	Inventory control, including bill of materials and purchase orders
Costing	Job costing and purchase orders
MultiCurrency	Enables foreign-currency capability
Reporting	Gridview, Chartview, ODBC and FX Pro

Affordable Pricing

Adagio Cloud is priced for cost-conscious businesses starting at $295 per month. The on-going costs are affordable and predictable from year to year. You may terminate the service at any time. Adagio Cloud is a convenient alternative to running your accounting system on a local- or wide-area network.

Hosting Services

Our Partners operate state-of–the-art datacenters through-out North America that ensure 24x7 service and availability.

Adagio Cloud environment includes:
• 50 GB Storage: additional space available for purchase.
• Adagio Manager: for managing companies, users, applications, security, updates and upgrades.
• Adagio Datacare: for running automated data integrity checks and on-demand backups.
• OpenOffice (Optional): subscribe to Office 365, or use your existing MS Office locally.

Adagio Cloud Datacenters are equipped with advanced security, hardware and software to ensure your data is private and safe. The physical premises are also secured and reinforced.

Your Adagio Cloud environment is backed up daily and weekly to provide you with a total of 15 backups at all times with 10-daily and 5-weekly backups. In addition to this backup regiment, you may use Datacare to do your own backup in the cloud, and then transfer the zipped backup to your local workstation.
