

Crystal Reports 8.5 for Adagio is shipping!

Softrak is pleased to announce that Crystal Reports 8.5 is now available to report on your Adagio® or ACCPAC® Plus™ accounting data files. With this powerful tool, you'll be able to easily:

- ◆ Chart your sales by customer or item to visualize your data
- ◆ Chart your sales on a map, to see geographic hot-spots
- ◆ Prompt for run-time values just before a report is printed
- ◆ E-mail reports to anyone in your address book, and create HTML reports for your web site.
- ◆ Export your data to Excel, HTML, Word or another database (including XML) for further reporting
- ◆ Create custom alerts, that bring specific conditions (unusual pricing or discounting, overdue invoices) to your attention as a report is printed

If you are running Quik Reports for Windows, this amazing upgrade to Crystal reports implements many features that we've been asked for:

- ◆ Print out the selection formula on your report
- ◆ Give your reports long file names – Crystal 8.5 is fully 32-bit
- ◆ Multi-page header and detail sections
- ◆ Running totals on reports
- ◆ Much faster printing (over 300%!)
- ◆ No limits on the amount of reported data
- ◆ ...and much more!

If you are running Quik Reports for DOS, you already know how useful it is to be able to create your own reports using your own accounting data. Here's what you can add, without changing anything else in your accounting department!

- ◆ Easy graphing of sales or expenses
- ◆ E-mailing or faxing of reports from your desktop
- ◆ Drill down from single page summaries to see the underlying details
- ◆ Full font control, color and line drawing
- ◆ Simple cross tabulations and laser printed mailing labels
- ◆ Print preview
- ◆ ... and much more!

If you are running ACCPAC Plus Order Entry, Inventory, Sales Analysis or other Operational Suite modules:

- ◆ Report sales by customer, by product, by territory in any sequence, summary or detail
- ◆ Verify sales margin is maintained on a daily basis
- ◆ Inspect items, orders or purchase orders where pricing is unusual
- ◆ Create simple, one line ad-hoc reports on virtually anything
- ◆ E-mail or fax performance reports
- ◆ Add Windows-based reporting, without changing your accounting
- ◆ ... and much more!

If you are running Adagio Accounting:

- ◆ Change the layout of any management report in any Adagio module
- ◆ Remove unwanted fields and re-arrange information
- ◆ Add graphs and logos
- ◆ Create simple exception reports to ease data management
- ◆ A must for Operational Suite (O/E, I/C and Invoicing) users
- ◆ Export to XML
- ◆ ... and much more!

Note: Comparisons with other products were made from information available and believed accurate at the time this document was prepared. As software changes frequently, please verify specific comparisons with your reseller. We welcome the opportunity to correct any inaccuracies brought to our attention.
