

Products by IMS Island MicroSystems

CounterSales for Adagio: CounterSales provides cash register and sales invoicing functions, fully integrated with Adagio Inventory and Receivables.

- Process sales, credits, payments on account and paid outs.
- Payment types are user defined. Any payment type can be supported, including cash, check, credit card, gift certificate, Interac and On Account.
- Enter item serial numbers through SerialTracker prior to or during a sale.
- Look up items and customers directly from Adagio.
- Flexible discounting by line, invoice, or target subtotal for invoice before taxes.
- Override cost on non-stock items on the sales screen.
